PROFILE

Dynamic Software Engineer specializing in React and JavaScript, with a passion for technology and innovation. Developed a feature-rich Employee Management System and a dynamic e-commerce website, enhancing productivity and user engagement. Proficient in problem solving, data analysis with Power BI, and delivering creative, high impact solutions with precision and efficiency.

PROJECT

Infinite Quests

- Developed a fully responsive website using React, Router, and CSS, allowing users to explore countries by continent or alphabetical order. The site also offers interactive exploration of the universe, including stars, black holes, galaxies, and planets. [infinite-quests](#)

Employee Management

- Developed a robust Employee Management System using React.js with dedicated user and admin panels. Implemented secure authentication, real-time task assignment, deadline tracking, and progress monitoring to enhance productivity and efficiency. [E-manag](#)

E-commerce

- Developed a dynamic e-commerce website using React.js, allowing users to browse products, add/remove items from the cart, and enjoy a seamless, interactive shopping experience that enhances user engagement. [E-commerce](#)

Simon Says

- Developed an interactive Simon Says game using JavaScript, featuring dynamic color patterns and sound effects to enhance user engagement and improve memory skills. [Simon Says](#)

Dashboard

- Designed an interactive Power BI dashboard with insightful visualizations, enabling data-driven decision-making and providing clear, actionable business insights.

ACTIVITY AND ACHIEVEMENT

A dynamic individual with experience in organizing university events and volunteering for community initiatives. Proven in leadership, time management, and collaboration, with achievements like 1st Rank(University level) in Smart India Hackathon, completing 250+ DSA problems on LeetCode and GFG, and excelling in event management and team leadership.
